

Medical Visit Report

Generated: 2025-12-10 15:18:19

Patient Information

Name: John

ID: 8

--- VISITSUMMARY ---

John presented for a dental evaluation due to concerns about gum bleeding and sensitivity in his lower right molar. Dr. Elena conducted a thorough examination, discussed oral hygiene practices, and reviewed dental x-rays. Early signs of tooth decay and gum inflammation were identified. A dental filling was recommended, and a follow-up appointment was scheduled for next Tuesday at 2 PM.

--- SUBJECTIVE ---

The patient reports, "I've been experiencing some sensitivity in my lower right molar, and my gums have been bleeding while brushing." He admits, "I haven't been consistent with my oral hygiene routine as I should be." He brushes twice daily but does not floss regularly. No other dental or systemic complaints were mentioned. Review of systems is positive for dental sensitivity and gum bleeding, negative for other oral pain, swelling, or systemic symptoms.

--- OBJECTIVE ---

Physical examination findings:

- Gen: Appears well-nourished and in no acute distress
- HEENT: Signs of gum inflammation noted, otherwise within normal limits

Labs/Imaging:

- Dental x-rays: Early signs of tooth decay identified in the lower right molar.

--- ASSESSMENT & PLAN ---

John presents with gum inflammation and early tooth decay. The plan is to address both issues to prevent further dental complications.

Gingivitis (K05.10)

- Recommend improved oral hygiene, including regular brushing with a soft-bristled toothbrush, daily flossing, and routine dental visits.
- Educate patient on proper brushing technique and importance of replacing toothbrush every three months.

Dental caries, unspecified (K02.9)

- Dental filling recommended for the lower right molar to restore tooth structure and function.
- Schedule follow-up appointment for dental filling procedure.
- Monitor for progression of decay or development of additional symptoms.

No other acute dental or systemic issues identified at this time.

--- PATIENT INSTRUCTIONS ---

John 12/1/2025

Thank you for your time today. We appreciate your commitment to addressing your oral health concerns promptly. Based on our conversation and examination, here is a summary of the key instructions and information discussed:

- Brush teeth twice daily with a soft-bristled toothbrush using gentle circular motions
- Floss daily to remove plaque and food particles between teeth
- Replace your toothbrush every three months
- Maintain regular dental check-ups and cleanings
- Return for scheduled dental filling on the lower right molar on 12/12/2025 at 2 PM
- Contact the clinic if you experience increased pain, swelling, or other new symptoms
- Take care of total mouth hygiene.

DR.Elena
