

ANKIT SHAH

FRONTEND ENGINEER -
(REACT JS, REACT NATIVE,
IOS)

ankitbshah.112@gmail.com

+91 9699413056

Pune, MH 411027

SKILLS

React JS

React Native

Swift / Swift UI

Redux / Redux Toolkit

Javascript / Typescript

Tailwind CSS

Code versioning tools

Technical Hiring & Mentoring

Stakeholder Communication

Conflict Resolution & People Management

Cross-functional Collaboration
(Product/Tech/Ops)

Agile Delivery & Release Planning

PROJECTS

U.S.News - U.S.News&World Report, USA

Citi Mobile - Citi Bank, USA

Barclays Mobile Banking - Barclays, UK

Mybarclaycard - Barclaycard, UK

Enterprise Apps - Eli Lilly, US

EDUCATION

Dwarkadas J Sanghvi College of Engg.
Mumbai, India • 05/2010

Bachelor of Engineering: Electronics And
Telecommunication

PROFESSIONAL SUMMARY

Frontend development lead with 15 years of experience driving the design, development, and delivery of **high-performance React.js, React Native and iOS applications**. Specialized in building scalable, secure, and user-centric solutions for major **US and UK financial institutions**. Proficient in **React.js, React Native, Swift, Objective-C, SwiftUI** with a deep understanding of **cross-platform architecture, regulatory compliance**, and **modern UI/UX design principles**. Recognized for **technical leadership, innovation**, and a proven ability to align engineering excellence with business goals to deliver exceptional user experiences across mobile and web platforms.

WORK HISTORY

Tata Consultancy Services - Senior App Developer / Technical Team Lead
Pune • 08/2010 - Current

Technical Expertise

- Delivered a React JS and React Native app for a leading news company in the U.S. Implemented state management using Redux Toolkit, client-side routing using React Router v6, lazy loading, and nested route structures. Designed responsive layouts using Tailwind CSS and Material-UI.
- Integrated RESTful APIs and GraphQL endpoints using Axios, React Query. Implemented caching, pagination, and infinite scroll for optimized data loading. Handled error boundaries, loading states, and global error management.
- Delivered native iOS applications using Swift, Objective-C, and SwiftUI; applied MVVM design patterns, and modularized architecture to streamline the codebase and accelerate development cycles.
- Implemented robust accessibility features, enabling users with disabilities to navigate apps with ease and independence.

Leadership & Delivery

- Led the development and delivery of web and mobile banking apps for various customers, including leading U.S. and U.K. financial institutions, serving millions of users with secure and intuitive digital experiences.
- Progressed from junior developer to technical lead, managing cross-functional teams, and mentoring junior engineers across multiple mission-critical projects.
- Owned full SDLC—requirement analysis, architecture, development, testing, deployment, and post-launch support—with a focus on scalability and maintainability.

Quality & Process

- Conducted regular code reviews, upholding clean code practices, and fostering a culture of quality, performance, and continuous improvement.
- Partnered closely with designers and product owners to align business needs with user-centered design, and technical feasibility.
- Contributed to agile ceremonies, improved sprint planning accuracy, and boosted team velocity through better estimation and process refinement.
- Leveraged analytics tools to boost continuous, data-driven optimizations.
